ALICE DUSSUTOUR

Depending on your country of birth, being born a girl doesn't always mean the same thing. This book helps us to explore different realities in our world.

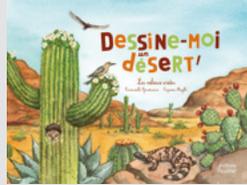

› NAÎTRE FILLE

BORN A GIRL

5 girls from different parts of the world (Nepal, Mexico, Afghanistan, Kenya, and France) describe their daily life and what adolescence means with respect to their country's customs. They question injustice and violence. With the help of adults, they make us think about women's rights and committing to a future that is more just.

Children's Books

**EMMANUELLE GRUNDMANN
CAPUCINE MAZILLE**

Deserts are often associated with sand dunes and crushing heat. And yet, we've known for a long time that deserts aren't... deserted!

› DESSINE-MOI UN DÉSSERT ! :
LES MILIEUX ARIDES

DRAW ME A DESERT! ARID PLACES

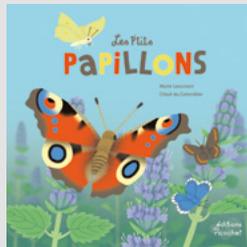

In reality, they are home to many plants and animals that help one another to survive in these arid conditions. When it finally rains, succulents and cacti fill their leaves and stems, the acacia tree draws moisture through its roots, and the giant Saguaro acts like an accordion when it gorges on water. Slurp! These plants then offer food, water, and shelter to animals like the kangaroo rat, the Gila wood pecker, or bats. Impressive!

Children's Books

**MARIE LESCROART
CHLOÉ DU COLOMBIER**

The life of lepidoptera!

› LES P'TITS PAPILLONS

LITTLE BUTTERFLIES

Butterflies amaze us with their colors. When spring comes, they fly from flower to flower in our gardens and countryside. Over the course of its life, a butterfly undergoes many changes! First a tiny caterpillar emerges from an egg, which grows and grows until it is too tight in its carapace. Then the caterpillar shuts itself up inside its chrysalis, which hardens and becomes a cocoon. A few days later, a magnificent butterfly emerges!

**MARIE LESCROART
CATHERINE CORDASCO**

*Stretching out over
2,000 kilometers off the
eastern coast of Australia,
discover this fantastic marine
garden and its many colors.*

LA GRANDE BARRIÈRE DE CORAIL :
JARDIN DE L'OcéAN

THE GREAT BARRIER REEF OCEAN GARDEN

In 1768, the French seafarer Louis-Antoine de Bougainville first described these "dangerous reefs." He decided to change course, thereby missing out on all of their treasures! With 3,000 reefs and 1,500 islands, the marine park of the Great Barrier Reef has many different kinds of corals. Gobies, clown fish, and triggerfish imitate their colors to blend into their surroundings. Nearly 1,400 species of sharks also live there!
