Throughout the entire world, cities are becoming bigger and bigger, so vast that one can feel a little lost. Is it therefore possible, in a world where everything changes so rapidly, where social inequalities are increasing, to create a city, or part of a city, where one would be able to breathe, to grow vegetables, to be more mobile, to be smarter(!), more active? A city that would suit everybody. Didier Cornille explores all kinds of new ideas, neighborhoods and ways of life, of a city or a specific area. Put together, these new cities would certainly create the perfect city of tomorrow. A book to get acquainted with and get a better understanding of all the experiments that are building the city of tomorrow, and better futures, perhaps.

Bob and Co.
Bob et compagnie
Delphine Durand
Rouergue, 2018

In Bob and Co., Delphine Durand reveals the truth about the first day of creation. The protagonists (water, the sun, the earth, the sky, the void, God, and Bob) appear one after the other to tell their story and make history. The excited characters sit down rather chaotically on the benches of life. Just like at school, there are the latecomers, the impatient ones, those that talk incessantly about the weather... The characters, surprising and yet familiar, are like unruly children, naive and spontaneous, and just about to start learning about life. What if, at the very beginning, the world looked like one big playground?

It tells, in the child’s words, all the steps they took together: the trauma of the first hospitalization, the hospital visits, the meetings with the caregivers. In plain talk the young narrator shares her fears, doubts and uncertainties and how, in spite of it all, she continues to live a relatively normal daily life. Humorous and poetic simple down to earth writing. Of course, the illness is ever present, but the story is alive with energy and optimism.
